## Introduction

The 32 unique cards in the NPC generator can be used to create a vast number of characters in GRIMLORE. Here is a brief explanation of how this deck is used.

Keep the most important rule in mind: All content in this deck is subject to the players' interpretation. These are merely ideas and inspirations to get players moving. You can interpret the results of your draws in any way that suits you!

You could use these cards as 32 NPCs, but we recommend drawing multiple cards to create a character. The combinations of individual traits can yield thousands of results.

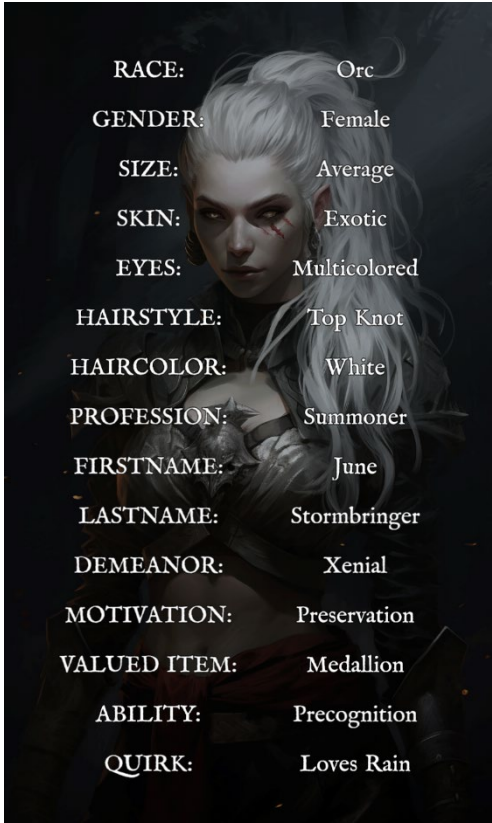

Simply draw between 1 and 15 cards to generate your NPC. We recommend drawing 5 cards, each describing 3 traits. Additionally, this deck can be used with any other fantasy RPG since it is system agnostic.

However, keep in mind that the characters are based on a dark fantasy setting.

Now go out and create your quest givers and archenemies!
